

WHOLE SYSTEMS PARTNERSHIP

Wet AMD – a systems model to support commissioning and capacity planning

Whole system dynamic modelling

A dynamic model synthesising what is known about Wet-AMD prevalence, treatments and patient behaviour to support commissioners' decisions for capacity needs and costs.

Available on CD with:

- A simulation model to test alternative treatments and scenarios with local demographic data, specified by the end-user
- A simple 'user guide'
- A presentation summarising the model assumptions
- A run-time license for ithink™
- Support 'advice line'

First CD - £295

Subsequent copies - £120 per CD

All prices exclusive of VAT
