

Subject	Introduction to Systems Thinking and System Dynamics Modelling and Simulation using the Stella Architect tm software (former iThink).
Suitable for	<p>The full two day course is designed for people who need a comprehensive training package to getting started in modelling with Stellatm.</p> <p>Day 1 is also offered on its own and would be suitable as an introduction for senior managers or executives to explore the benefits of using systems modelling in their organisation.</p>
Format	Interactive and participative using the Stella tm software to develop skills in whole systems modelling.
Location & Dates	Venue: Knaresborough, North Yorkshire. 3rd & 4th May 2017.
Cost	Two day course @ £995.00 + VAT. Public sector, charity and voluntary sector: Two day course @ £895.00 + VAT

Synopsis

A practical programme developed for managers and executives at all levels, especially commissioners, planners and analysts with strategic or operational change management responsibilities. Learn the basic of systems thinking and building simple models to demonstrate and communicate learning.

Benefits

Participants return to their organisations able to:

- ◆ Think about strategic and operational issues in systemic terms
- ◆ Formulate strategies that are aligned with operational reality
- ◆ Design effective business processes
- ◆ Explore different options and assess their costs and benefits
- ◆ Reveal hidden problems of change
- ◆ Use simulation to identify and avoid actions which are counter productive
- ◆ Communicate effectively using simple system dynamic models
- ◆ Share models with colleagues to enhance learning

2 Day Workshop Programme

Day 1 – Overview of Whole Systems Modelling with Stella™

Introduction to whole systems modelling; background, benefits, applications, key learning opportunities

Problem identification and systems mapping – causal loop diagrams and 'behaviour over time'

Mapping systems as processes – introduction to stocks and flows

Developing understanding of system performance – simulation models

Day 2 – Using systems modelling to communicate and share learning

Review of Day 1

Model building exercise focused on your own issues

Understanding the software and its potential

Using models to share insight and engage with stakeholders

Leading the workshop: The workshop is led by senior consultants from **Whole Systems Partnership** - specialising in programme development for whole systems change within health and social care.
